

## OVERVIEW

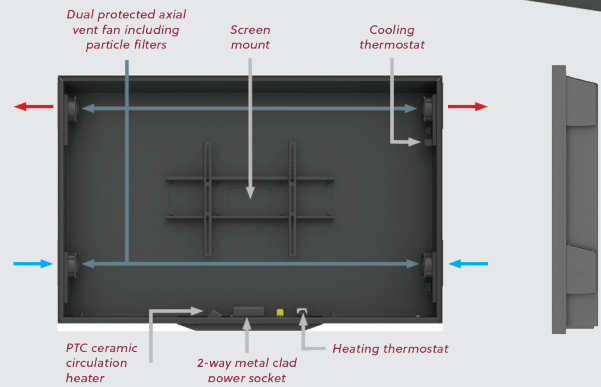

Designed for ultra bright screens where brightness levels up to 2500 NITS are commonplace and under certain conditions enclosure temperatures up to 55°C are possible. All are constructed in high grade aluminium for lightness and complete corrosion resistance and utilise high quality temperature control components within.

Our well-proven range of housings can be supplied in this version, from small screen monitors up to the latest 86" large screen sizes. Bolt down, floor standing versions are also available.
